

### CONFIGURAZIONE / CONFIGURATION / KONFIGURATION

| Descrizione meccanismo                     | Mechanism description            | Getriebebeschreibung                     | RIG06 2-310 VLRAX VCS DA |
|--------------------------------------------|----------------------------------|------------------------------------------|--------------------------|
| Legge di moto                              | Motion law                       | Bewegungsgesetz                          | 2-310 (Ca=8.013) -       |
| N° cicli                                   | Number of cycles                 | Anzahl der Schaltzyklen                  | 1                        |
| Versione uscita                            | Output version                   | Ausführung Schalttisch                   | VCS                      |
| Piano albero entrata                       | Input shaft projection           | Seite mit Antriebswelle                  | DA                       |
| Predisposizione riduttore                  | Gearbox pre-arrangement          | Einrichtung für Getriebe                 | 50/F1 LCB                |
| Posizione riduttore                        | Gearbox position                 | Anbaulage des Getriebes                  | S3                       |
| Forature sul piano superiore della scatola | Holes on the housing upper plane | Gewindebohrungen in der Gehäuseoberseite | No                       |
| Forature opzionali di riferimento          | Optional reference holes         | Optionale Stiftlochbohrungen             | No                       |

### RIDUTTORE / GEAR UNIT / GETRIEBE

| Descrizione riduttore  | Gear unit description   | Getriebebezeichnung        | RMI 50/F1 LCB |
|------------------------|-------------------------|----------------------------|---------------|
| Predisposizione motore | Preset for IEC motor    | Verbindungen mit IEC-Motor | 71B14         |
| Rapporto riduzione     | Gearbox reduction ratio | Getriebeübersetzung        | 1:28          |
| Taratura               | Adjustment              | Auslösemoment              | 63.0 Nm       |
| Codice riduttore       | Gear unit code          | Getriebecode               | 3104213       |

### MOTORE / MOTOR / MOTOR

| Descrizione motore   | Motor description     | Motorenbeschreibung   | BA71C4B14                     |
|----------------------|-----------------------|-----------------------|-------------------------------|
| Freno                | Brake                 | Bremse                | Yes                           |
| Tensione e Frequenza | Voltage and Frequency | Spannung und Frequenz | 230/400V 50Hz - 277/480V 60Hz |
| Potenza              | Power                 | Leistung              | 0.55 kW                       |
| Codice motore        | Motor code            | Motor Code            | 3106550                       |

### MICRO / MICRO / ENDSCHALTER

| Tipo gruppo micro | Micro assembly type | Typ der Endschalterbaugruppe     | MID  |
|-------------------|---------------------|----------------------------------|------|
| Versione micro    | Micro version       | Version der Endschalterbaugruppe | Full |
